

PROJECT : OOPS

What we offer :

- **For Students**
 - Student Trainings
 - Projects
 - Certifications Internships
- **For Company**
 - We provide highly skilled intern
 - Provide Employees on contract basis
- **For Projects Development**

For Students

1. **Student Training** : We will provide online training to students on various technologies and help them to grow themselves by giving them a proper direction and mentor assistance . After successful completion of training there will be an exam and based on that exam students will get a certificate .
2. **Projects** : One of the biggest issue students face nowadays is choosing a suitable project that will actually improve their skills and adds a value point in their resume . Even after finding the project idea most of students are not able to implement it actually so here we came . We will suggest some good projects to student and provide them online assistance during development of their project .
3. **Certifications / Internship** : Working on academics project is good for learning but still when we go for production level projects we will face many issues while building them like scalability , security , performance and many more .So we also provide skilled students an opportunity to work on such projects that will be used by giant techs and after successful completion of project they will also get an internship certificate from company .

For Company

1. **Provide Interns** : Now you do not have to waste your time and money in hiring procedure of interns ,we will do this for you . We provide specific training to students and hence properly skilled students can be easily found out on our platform .So it will make hiring procedure simple .
2. **Provide Employee on contract basis** : Some requirements are only for a while and hence required such employees for a span of time so we provide employees of specific skills on contract basis .

For Projects

Whether you are running a small business and want to add ecommerce to your business or you just want some project to be developed then you do not need to visit freelancer website to get your projects done we will develop your projects at competitive market price by professionals .
